

BigDigit DISPLAY

DESCRIPTION

The BigDigit Display is used with the COUNTDOWN TIMER CONTROLLER and as an add-on accessory to the COUNTDOWN TIMER with the BigDigit Output Option. The large, bright digits are visible from a considerable distance under various ambient lighting conditions. The numerical display is slaved to that of the COUNTDOWN UNIT to which it is connected. Any number commanded on the COUNTDOWN UNIT is tracked by the BigDigit Display. Multiple BigDigit Displays can be connected to one COUNTDOWN UNIT. BigDigit Displays have two cable connectors allowing them to be daisy-chained; a 5-way splitter is available if more connection options are required. Each BigDigit Display is powered by its own wall transformer which must be plugged into a **110-Volt AC** outlet.

Each BigDigit Display is connected to the COUNTDOWN UNIT by means of a six-conductor cable. A 25-foot cable is supplied as standard; however, any **non-reversing six-conductor cable** with similar connectors can be substituted for the one which comes with the unit. Additional cables and junction connectors are available as accessories if greater cable length is required.

Two mounting holes are provided on the face of the BigDigit Display for fastening to any vertical surface or attachment to the optional table-top stand.

OPERATION

- Extend the interconnecting cable between the BigDigit Display and the COUNTDOWN UNIT.
- Connect one end of the cable to either connector on the rear of the Display and the other end of the cable to either connector on the rear of the COUNTDOWN UNIT.
- Plug the wall transformer into a **110-Volt AC** outlet. If the COUNTDOWN UNIT is powered up, the number showing on the BigDigit Display will immediately correspond to the number to which the COUNTDOWN UNIT is set. If the UNIT is not powered up or connected to the BigDigit Display, the BigDigit Display can show any random number or be completely blank until the COUNTDOWN UNIT is connected and powered up.
- When all the units have been connected and powered up, operation of the BigDigit Display is now under the command of the COUNTDOWN UNIT to which it has been connected. Refer to the instruction sheet for the COUNTDOWN TIMER or COUNTDOWN TIMER CONTROLLER for further operating information.
